INTRODUCTION FOR SOUFAST(FUJIAN)MOTOR CORP.LTD

April.2014

Fujian Motor Industrial Group Co.,Ltd.

Taiwan China Motor Co.of Yulon Enterprise Group

Mitsubishi Motors CO.,Ltd

President : Lian Xiao Qiang

General manager : Tso, CHI-SEN

Registered Capital : US\$138million

Total Investment : US\$226.90million

Land Space : 833,034 square meters

Employee : 3305人 (by2014/1)

With the common development of national automobile industry across straits, Fujian Motor Industrial Group Co.,Ltd and Taiwan China Motor Co.of Yulon Enterprise Group set up a joint venture company South East(Fujian)Motor Co.,Ltd in Nov 1995 which is the biggest motor manufacture across straits. And build the South East Motor Zone in 26th,Sep in 1999. In April 2006, Mitsubishi Motors Co.,Ltd joined in , South East Motor rising to International level Motor Manufacture enterprise.

PRODUCT HISTORY

New energy resource

South East Motor is engaged in new energy resource development , and cooperate with Automotive Research Institute of Fujian Motor Industrial Group Co.,Ltd , take the advantage of technology in new energy , activate the research and development work of EREV.

- Jun 2011, V3 battery change model has been run over 15 million KMs, and quality is stable and durable
- Feb 2013, V3 battery change model has been approved by the MIIT, become the first battery change model of new engery sedan.

Soueast Motor R&D center has been completed in Jun 2006, and equipped with vehicle emission lab, environmental lab, strength lab、Modelling lab、Computer aided design studio、Clay model room、Three dimensional room and Five elements analysis room . R&D center has the ability of self-design, body remould, chasis design and vehicle test.

- 2006: awarded "Provincial technology center "
- 2007: awarded "Fujian province high and new technology enterprise"
- 2008: awarded "National laboratory"
- 2011: establish SOUEAST AUTOMOTIVE RESEARCH
- INSTITUTE
- 2012:establish Academician working communication station

Complete vehicle manufacturing process

vehicle manufacturing process

PRESS
HEM

Capacity: 1,440,000 units/Year(3 shift)

Feature:

- | Press line, forming not to cause concavity to ensure accuracy of single part and whole body easily .
- | Hem line, multi-model and robot hemming system are used.

Production management :

- | The die-changing time is less than 3minutes, the same level with advanced motor co.
- | Parts production are allowed by “Just in Time” ruler.

Quality Assurance :

- | Inspection jigs for part and assembly parts.
- | Error proof function used in production equipments.

WELDING

Capacity: 200,000 units/Year (2 shift)

Feature:

- | A highly automatic and efficient process,77 robots in production line.
- | Production line monitored by computer system ,Expand the TPM activity to improve production efficiency.

Quality Assurance :

- | Non-destructive ultrasonic welding inspection.
- | In line body accuracy inspection, Error proof function.
- | Parameter measurement of welding equipment monthly.
- | Accuracy measurement of Main Assembly Jig periodically.

PAINTING

Capacity: 150,000 units/Year (2 shift)

Feature:

! Production process designed by Durr. The painting sequence regulated by computer system to optimize process of multi-model & reduce VOCs exhaust.

! PVC under coating by robot, automatic painting of ESTA used in primer and top coat spraying .

Quality Assurance :

! Specification based on Mitsubishi Motor Co. Rust proof ability Salt Spray Test (SST) over 1000 hours.

! Quality controlled by production process and final inspect station , quality feedback per two hours.

Capacity: 180,000 units/Year (2 shift)

Feature:

! Mixed-models production method to reduce inventory and meet the market demands .Supply parts by kits method to raise produce rate.

! The door-less assembly method to improve installation process.

Quality Assurance :

! At the key (critical) station, fool-proof devices used to assure safety & function parts installed process.

! Inspection line is certified and authorized by the Department of Transportation (DOT)
